The Massacre at Castellon and Desolation at Bielsa

THE EVIDENCE

On June 27th, Sir Henry Page Croft drew attention in the House of Commons to the wanton destruction by incendiarism of the whole of the Bielsa district by the 43rd Division of the Barcelona troops before they fled into France, and also the massacre of civilians in Castellon by the Militia who tricked the populace into the belief that they were welcoming General Franco's troops prior to the entry of the Nationalist Army.

Sir Henry invited the Government "to protest" and "express its abhorrence at such barbarity", or at least to make immediate enquiries.

These questions caused the Socialists to make a sustained attack upon the Member for Bournemouth, one Socialist describing the questions as "vile suggestions", Mr. Gallacher, the Communist, referring to them as "sheer fabrication", and Sir Archibald Sinclair, the Liberal Leader, as "an outrageous use of the Order Paper".

Sir Henry Page Croft now issues the following statement:—

Very numerous questions have been asked by Socialists and Liberals about Spain during the last eighteen months, when official answers have proved there was no shadow of foundation for suggestions made in the questions.

I am in a position to produce a volume of evidence in support of my main contentions.

The facts about Bielsa have been so widely reported in the Continental Press and endorsed by British witnesses that there is no need to enlarge upon this tragedy. Suffice to say that the Bielsa district and villages for miles around were reduced to ashes by deliberate incendiarism. One correspondent, accompanying several journalists says "—Words cannot describe the irreparable ruin."

"Le Jour—Echo de Paris," sums up the situation as follows (June 17th, 1938)—

"When they took refuge in France the Militiamen of the 43rd Division left nothing behind them but smoking ruins. The trained teams of Dynamitards and Incendiaries have not left a shepherd's hut. First, two thousand families have seen their homes pillaged and then burnt. They have not even pardoned them their cattle which have been stolen and led away by the fugitives. (Signed) A. de Mussac."

Anyone can go to Bielsa and prove the truth of these statements.

I now come to the far more terrible events of Castellon. The massacre, whilst happily not so far reaching as the first cables indicated, was one of the most bestial and wanton in the annals of history. Some 2,000 inhabitants were tempted out of their refuges and homes by the pretended arrival of the Nationalist Army on the part of Militiamen, who then opened machine-gun fire and threw hand grenades on the crowd of rejoicing civilians—men, women and children—resulting in the annihilation of over 200, and wounding and injuring a far larger number.

The following account of the Correspondent of "La Liberte" at Castellon on June 17th, 1938, gives a description which is completely substantiated by the leaders of all sections of society in Castellon:—

"When the advance guard under Major Salardon arrived, the population began to express its enthusiasm for its deliverance. The occupation of the city had

WHAT IS

THE TRUTH

ABOUT SPAIN ?

1. It is not a struggle between Fascism and Democracy.

"This step (the appointment of Caballero as prime minister) had been postponed for one week or two because of the possible reactions abroad. The Left abroad had taken the line of representing the struggle in Spain as one between Fascism and Parliamentary Democracy. The reason was that they wanted to gain as wide a support for Spain as possible. For weeks they could point to the non-socialist character of the Spanish Government. Indirectly the defence in Spain against the rebellious army was weakened in that way, during those weeks. Again we see that it is harmful to spread for purposes of propaganda statements known to be untrue".

(Dr. Conze, a member of the Labour Party and supporter of the Valencia Government, in *Spain To-day* p. 148).

2. The Government was not legally elected.

"The mob seized the ballot papers, with the result that false returns were sent in from many places

"In certain provinces where the Opposition had been victorious, all the mandates were annulled and candidates who were friendly to the Popular Front, although they had been beaten, were proclaimed deputies".

(Niceto Alcalá-Zamora, President of the Republic at the time. From the *Journal de Geneve* January 17th, 1937).

HOW POPULAR FRONT GAINED POWER IN SPAIN

PARADOXES OF THE ELECTIONS.

EX-PRESIDENT'S COMMENTS.

By the Marques DEL MORAL.

Sir—During recent months a number of misstatements have appeared in the Press, some of which I called attention in my letter in THE DAILY TELEGRAPH on Aug. 21, dealing *inter alia* with the question of the Spanish elections on Feb. 16, 1936.

The figures of the voting at the elections were officially given by the Spanish Government as:

Popular Front	... 4,356,000
Parties of the Right	4,570,000
Centre	... 340,000

leaving a majority to the Right of 214,000 votes, without taking the Centre Party into account on either side.

These figures were and have been accepted as official and quoted by the Royal Institute of International Affairs as authoritative. Other figures have since been given out on the authority of the Madrid Government in a belated endeavour to explain away the awkwardness of those above-mentioned.

A most important statement appeared in the "Journal de Genève" on Jan. 17 by Señor Alcalá Zamora, who for nearly

five years, until April 7, 1936, was President of the Republic; the truth of this cannot be minimised nor explained away.

UNFAIR WEAPONS.

He commences by saying that he is "loath to speak, at this juncture, of the inexperience and folly of my sons, who, inflamed by the evil passions of the men of the Left, have been misled into throwing themselves into the furnace of the Civil War. By taking hostages so near and dear to me the Valencia Government has armed itself with unfair weapons. But, though reeling from the blow, I have by a determined effort recovered my full liberty—liberty not only of thought, but of the pen and action."

Señor Alcalá Zamora states that for the first seven weeks (Feb. 19 to April 7) as President he retained the power as such free from control by the Popular Front, but when he was dismissed from office and during the 100 days preceding the outbreak—"Anarchy no longer met with any obstacle. The tactics of the Popular Front were twofold—in the Cortes it was all-daring: in the Cabinet it was weak though everready to provoke trouble."

SPAIN TO-DAY

Notes by an English Ex-Public School Master on the Spot

EDUCATION.

A Bill, passed in 1912, for free Primary Education, was never carried out. The Church, like the Church of England before the passing of a similar Bill in England, was unable to cope with the numbers who needed Primary Education, and could only afford to give it to about 500,000 children. The first act of the Spanish Republican Government was to close all the Church Schools and dismiss all the teachers because they belonged to Religious Orders. Thus was Spain left without teachers, and that by order of the Government.

NEUTRALITY

The clamour for neutrality began after the fall of Irun. The main line by rail and road for sending reinforcements from France was closed. The Nationalists now had the advantage as reinforcements from Germany and Italy came through the Southern Ports and Portugal. By air and by sea reinforcements were sent from Bayonne and other ports to Bilbao. Volunteers and war-material went through **Perpignan** to **Barcelona**. This enabled M. Leon Blum to say quite truthfully that no help was being sent to **Madrid**.

REFUGEES

At the fall of Irun, hundreds of the so-called defenders of the place, after looting and blowing up with dynamite the whole town, laden with their booty, rushed across the frontier. They were disarmed and forwarded to Barcelona via Perpignan, their arms being returned there. In 1870, a French Army Corps under General Bourbaki, was driven into Switzerland. There they were disarmed and interned "for the duration." Our Expeditionary Force to Antwerp was driven into Holland where the men were interned for the duration. Compare the different interpretation of "neutrality."

HOSTAGES

The taking of civilians, men and women, as hostages has been carried on wholesale by the Government troops and the Anarchists only. These hostages were shot or drowned by their captors whenever they met with a reverse anywhere. In Bilbao and Santander, for instance, several hundreds were brought out and shot, or bound hand and foot and thrown over the cliffs into the sea, as retaliation after an air raid.

X-DP269

H153

Today, the first of October, the parliaments of Valencia and Barcelona were about to reopen their sessions. Various Right Republican deputies had returned to renew their parliamentary activities, recognizing by their presence the legitimacy of the Republican Government.

The sinister Quiapo de Llano had announced repeatedly over the radio that the new sessions of parliament in Valencia and Barcelona would be greeted with fascist salvos of honor. And actually, a few moments before the opening of the Barcelona Parliament, three squadrons of aircraft composed of five, four, and two planes respectively, terrifically bombarded the civil population of the Catalan capital.

The reopening of Parliament was not the only event today; there was also the reopening of the primary schools. The bombs destroyed fourteen buildings in the workers' quarter of La Barceloneta, literally razing to the ground a school for kindergarten children. At the moment of sending out this message the work of searching the debris has scarcely been begun, but so far thirty-five dead and seventy gravely injured have been recovered, the majority of them children. The sight is horrible: decapitated babies, others with their lungs hanging out...

While Republican Spain seeks the road to peace by legal, parliamentary means, Franco's fascism offers us once again the Dantesque spectacle of the bodies of innocent children terribly mutilated.

Free Catalunya and Republican Spain send out a call to the conscience of the world: Stop the assassins who want to reduce European civilization to blood and flames!

SPAIN'S FIGHT IS OUR FIGHT

X-DF 269

A BITTER struggle is now going on before the eyes of the world. The first barricades against Fascist invasion in Spain have been thrown up and HELD. To Spaniards, Lincoln's question "whether this or any other nation can long endure part slave and part free" is no longer an academic one. For almost two years they have waged a fierce battle to insure peace, liberty and the rights of democratic government for themselves. The principles for which they are fighting are of vital importance to all peace-loving peoples. The Spanish people are fighting today for those democratic rights for which Americans fought and won in 1776.

We, the American people, rooted in the democratic tradition, cannot remain indifferent to the struggle in Spain. We must not stand paralyzed while Fascism marches on. We have seen it enslave the people of Italy and Germany, sweep over China, and seize a foothold in South America. The Spanish people are demonstrating now that Fascism can be stopped. It is for the democratic peoples of the world to support them. Our failure to do so endangers our own freedom and democracy. The fight against Fascism in Spain is our fight.

The Contending Forces in Spain

Who are the rebels in Spain today? They represent the feudal aristocracy, the corrupt elements in the army, the monarchists, the blind and ignorant clergy. They represent a privileged minority which for centuries has kept the Spanish people in poverty and in ignorance despite the abundance of natural wealth and the rich culture of the country.
